

KalliopePBX: Unified Communication for everybody

Francesco Oppedisano
May 2014

A standard meeting resource cost...

	Start/Destination	Duration
	MILANO CENTRALE [IT] ROMA TERMINI [IT]	3:02
	MILANO P.GARIBALDI [IT] ROMA TIBURTINA [IT]	5:33
	MILANO P.GARIBALDI [IT] ROMA TIBURTINA [IT]	3:10

Milano-Roma one way only for each passenger.

Source: ecopassenger.org

*Ideally a big tree can absorb about 45Kg of CO₂/year.
That tree needs 5 years to clear out our meeting.*

But don't forget time...

From 6 to 11 additional hours over the meeting duration

*The User is surrounded by **convergent** technology...*

Any service...

By any terminal device...

From anywhere...

*Through the same single network... the **INTERNET***

*Driver technology... **VoIP***

*NetResults answer... **KalliopePBX**
line of products*

KalliopePBX: a new PBX formula

OPENSOURCE

- ✓ Open technology
- ✓ Flexibility (possibility of customization)
- ✓ Free upgrades (when available)
- ✓ No recurring license costs
- ✓ Usage of standard protocols
- ~~✓ Community code review~~
- ~~✓ High complexity (and costs) of implementation and management~~
- ~~✓ Each installation is an 'ecosystem' of its own~~
- ~~✓ More likely to be subject to large-scale cyber attacks~~

COMMERCIAL PRODUCT

- ✓ Simplified system deployment
- ✓ Professional support offered by the vendor (Pre and post sales)
- ✓ Minor know-how required from the end-user
- ~~✓ Licenses and upgrade costs~~
- ✓ Industrial grade robustness
- ~~✓ Little (or no) customization options~~
- ✓ Lower susceptibility to cyber attacks on a large scale
- ~~✓ Solution closed to third-party products~~

KalliopeFAX is a Green solution since it significantly reduces the amount of paper used within a company and involves an extremely low power consumption (5W average, 7W peak), this way ensuring a significant reduction of costs.

In addition, thanks to the lack of moving parts (fans, hard drives) and to the very small size (176 x 174 x 30 mm) KalliopeFAX can be placed in environments exposed to dust or vibrations without any risk to its proper functioning.

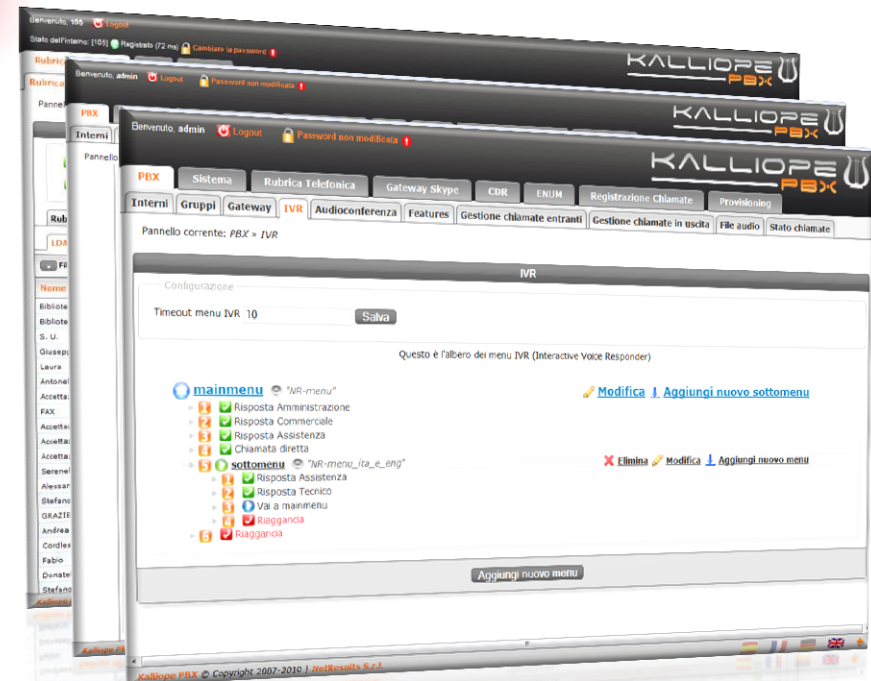

KalliopePBX means
IMMEDIACY

KalliopePBX is designed to be operated even by those who do not have specific expertise on VoIP (telephone installers or end users)

Through a web interface for complete management and intuitive interface, you can configure all services with a few clicks.

✓ All hw models available in HA

✓ KalliopePBX implements mechanisms that increase the **security** and **protection** from cyber attacks

KalliopePBX means
RELIABILITY

✓ KalliopePBX products are based on 3 main building blocks:

PBX Engine

GUI & System

VOIP & MoIP

KalliopePBX means
TECHNOLOGY

Complete offering

Mastery of VoIP technologies

- > *Fast responsiveness*
- > *Quality and performance*
- > *Frequent upgrades and new features*

Open to integration, customization and partnership thanks to the offering of high level professional services

High quality system integration network
