

SC2 – FOOD SECURITY, SUSTAINABLE AGRICULTURE AND FORESTRY, MARINE, MARITIME AND INLAND WATER RESEARCH AND THE BIOECONOMY

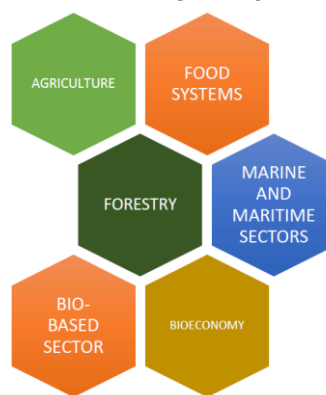

The 2018-2020 Work Programme (WP) of the Societal Challenge 2 focuses on the sustainable management of land and waters to secure healthy food as well as on the delivery of public goods such as biodiversity and clean water. Furthermore, it supports innovative food and marine industries, the bioeconomy and dynamic rural areas. The overall budget dedicated to SC2 is **€1.3 billion**. The WP focuses on the following five priorities:

- Addressing climate change and resilience on land and sea;
- Making the transition towards a circular bioeconomy;
- Fostering functional ecosystems, sustainable food systems, healthy lifestyles;
- Boosting major innovations on land and sea – new products, value chains and markets;
- Developing smart, connected territories and value chains in rural and coastal areas.

SUSTAINABLE FOOD SECURITY

€753 million to use our resources more wisely and nourish people more sustainably

From sustainable food security to healthy food

Activities aim to tap into the potential of ecosystems services for crop and animal production, notably in relation to pest and disease control, nutrient cycling, soil fertility and productivity. They emphasise the relationship between modes of food production, ecosystem functions, food quality and consumer health. The importance of diversity and diversification in increasing the resilience of food systems is an underlying theme. It includes promoting a better use of plant, animal genetic and microbial genetic resources. A cluster of targeted microbiome activities will help to better understand how existing biodiversity can support processes across soils, plants, animals, the marine environment and humans.

Environment and climate-smart food production and consumption

Proposed activities open avenues to progress on low greenhouse gas emission agriculture, fisheries and food industries. They will support the development of strategies and tools to better cope with more variable and extreme weather events, changing environmental conditions and new emerging threats. A number of topics target the mitigation capacity of the primary production sector and the synergies and trade-offs between adaptation and mitigation measures. Activities also tackle the stewardship and use of natural resources on land and sea and other inputs throughout food production. They aim at optimising resource use and reducing environmental footprints throughout primary production, food industries, food distribution, food service and households.

BLUE GROWTH

€239 million to sustainably harvest the potential of aquatic and marine resources, while protecting biodiversity and enhancing climate resilience

The **Blue Growth** Call aims at sustainably harvesting the potential of resources from seas, oceans and inland waters for different uses and across the range of marine and maritime industries, while protecting biodiversity and enhancing climate resilience. It supports sustainable growth in the marine and maritime sectors through a responsible management of marine resources for healthy, productive, safe, secure and resilient seas and oceans, which are essential for thriving ecosystems, climate regulation, global food security, human health, livelihoods and economies. This call will boost the **blue economy** by:

- Improving our integrated knowledge about the reciprocal impact of climate change on marine ecosystems and biological resources in order to effectively manage their response, mitigation and resilience capacities;
- Preserving and sustainably exploiting marine and coastal ecosystems, and biological resources to deliver improved nutrition and health;
- De-risking major investments and boosting blue innovations on land and at sea to develop new bio-based marine value chains and open up new markets;
- Developing smart and connected territories between land and sea;
- Strengthening the international research and innovation cooperation around seas and oceans, to promote a globally sustainable blue economy.

RURAL RENAISSANCE

€263 million for rural territories to become smarter, younger, greener, more circular and better connected

From farm to society: understanding dynamics and modernising policies

The objective is to better understand the assets and long-term drivers of rural territories and land use and establish how they are impacted by current policies. The design of innovative policy instruments/approaches and governance models through which to improve socio-economic and environmental conditions will be addressed. This includes activities on policies impacting the delivery of ecosystem services and public goods.

Action	Topic	Opening date	Deadline(s)
CSA	Building modern rural policies on long-term visions and societal engagement <i>Rural society-science-policy hub</i>	31/10/2017	13/02/2018

Organising sustainable food and non-food value chains under changing conditions

The objective is to boost the development of innovative and sustainable food and non-food chains and services to support the diverse needs of communities and businesses, in a responsible and ethical way, hence fostering sustainable growth and jobs in rural areas and connecting territories (e.g. coastal-inland, rural-urban).

Action	Topic	Opening date	Deadline(s)

Boosting innovation and enhancing the human and social capital in rural areas

The objective is to support sustainable growth by encouraging innovation. This involves two main strands of activities: 1) strengthening the skills, human and social capital of farmers, foresters and rural dwellers by improving cooperation, knowledge transfer and networking; 2) investing into the knowledge and innovation systems to improve their delivery. In particular, support to the implementation of the EIP-AGRI "interactive innovation approach" will be provided.
