SC5 – CLIMATE ACTION, ENVIRONMENT, RESOURCE EFFICIENCY AND RAW MATERIALS

The 2018-2020 Work Programme (WP) of the Societal Challenge 5 (SC5) focuses on moving to a greener, more resource efficient and climate-resilient economy in sync with the natural environment, demonstrating a strong commitment to supporting the **Sustainable Development Goals** (SDGs) and the targets of the **COP21 Paris Agreement**. In particular, the WP focuses on the following six priorities:

- Climate action in support of the Paris Agreement;
- Circular economy;
- Raw materials;
- Water for our environment, economy and society;
- Innovating cities for sustainability and resilience;
- Protecting and leveraging the value of our natural and cultural assets.

The overall budget dedicated to SC1 is about €1.1 billion.

The activities of this WP will be implemented by the following two calls for proposals:

BUILDING A LOW-CARBON, CLIMATE RESILIENT FUTURE: CLIMATE ACTION IN SUPPORT OF THE PARIS AGREEMENT

- Decarbonisation
- •Climate adaptation, impacts and services
- •Inter-relations between climate change, biodiversity and ecosystem services
- •The Cryosphere
- Knowledge gaps

GREENING THE ECONOMY IN LINE WITH THE SUSTAINABLE DEVELOPMENT GOALS

- •Connecting economic and environmental gains the circular economy
- •Raw materials
- •Water for our environment, economy and society
- •Innovating cities for sustainability and resilience
- Protecting and leveraging the value of our natural and cultural assets:
 Earth observation
- Protecting and leveraging the value of our natural and cultural assets:
 Nature-based solutions, disaster risks reduction and natural capital accounting
- Protecting and leveraging the value of our natural and cultural assets:
 Heritage alive

BUILDING A LOW-CARBON, CLIMATE RESILIENT FUTURE: CLIMATE ACTION IN SUPPORT OF THE PARIS AGREEMENT

This call aims to produce solutions for the achievement of the **Paris Agreement**'s mitigation and adaptation. The related actions also support relevant EU policies and objectives, such as the **Energy Union**, **Arctic policy**, **EU Adaptation Strategy** and **EU climate diplomacy efforts**. Special consideration is given to cooperation with strategic partner countries/regions. Ultimately, the actions are expected to support Europe's endeavours to implement not only the Paris Agreement but also the **Sustainable Development Goals** (SDGs), particularly SDG 13 Climate action, SDG 6 Ensure availability and sustainable management of water and sanitation for all, SDG 11 Sustainable cities and communities, SDG 14 Life below water and SDG 15 Life on land.

GREENING THE ECONOMY IN LINE WITH THE SUSTAINABLE **DEVELOPMENT GOALS**

This call focuses on moving to a greener, more resource efficient and climate-resilient economy in sync with the natural environment, demonstrating a strong commitment to supporting the UN's Sustainable **Development Goals.**

Connecting economic and environmental gains – the circular economy

Actions in this part of the call aim in the medium term to substantially improve the efficiency of resource use (including energy and water), to minimise the production of waste and increase the use of resources originating from secondary sources - while avoiding adverse health effects - and to reduce pollution and greenhouse gas emissions.

Action	Торіс	Opening date	Deadline(s)

	circular economy		

Raw materials

The EU is highly dependent on raw materials that are crucial for a strong European industrial base, an essential building block of the EU's growth and competitiveness. The main aim of this part of the call will be on achieving the objectives and meeting the targets of the EIP on Raw Materials. A wide range of actions will cover the entire EU raw materials value chain, from sustainable exploration, extraction, processing to recycling. Actors from the whole EU raw materials innovation chain will be involved, including researchers, industry, end-users, public authorities and civil society.

Water for our environment, economy and society

This part of the call supports and aims to accelerate the implementation of EU policies and initiatives relating to water, resource efficiency and water-dependent industries, while also contributing to policy relating to the Energy Union, climate action and the digital economy. Overall, actions are expected to lead in the medium term to: digital solutions for improved public- and private-sector decision-making on water-related risks, efficiency and resilience; substantial reductions in water and energy consumption; and the development of new markets for water-smart technologies and services. A further action focuses on EU-India cooperation to improve wastewater efficiency and quality of and access to drinking water in India.

Innovating cities for sustainability and resilience

Actions in this part of the call have the medium-term objective of enabling cities to design and implement transition pathways to becoming inclusive, resilient, sustainable, low-carbon and resource efficient by enhancing their innovation capacity and enabling them to act as hubs of innovation. Further actions aim to strengthen the sustainability of urban areas globally, and particularly in China and CELAC countries.

Protecting and leveraging the value of our natural and cultural assets: Earth observation

The capacity to observe the planet is evolving rapidly, leading to higher volumes of and more diverse data flows produced at European and national level by private and public operators (including from citizens). Actions in this part of the call aim to capitalise on these trends in collaboration with the **Copernicus programme**, to **develop new mass-market applications for businesses, citizens and public authorities**. Overall, actions are expected in the medium term to **stimulate growth and jobs in Europe in the context of the digital economy** (through open innovation) and to lead to **better informed decision-making in environmental policy and management** and in **disaster management**.

Protecting and leveraging the value of our natural and cultural assets: Nature-based solutions, disaster risks reduction and natural capital accounting

Actions under this section of the call aim to improve decision making, early warning, preparedness and communication among relevant actors to **better cope with earthquakes** through enhanced forecasting capacity. Furthermore, they aim to enhance the capacity of authorities and the private sector to **better assess and value biodiversity, ecosystems and their services** to enable them to incorporate and mainstream these values into their accounting and decision making frameworks.

Action	Торіс	Opening date	Deadline(s)

Protecting and leveraging the value of our natural and cultural assets: Heritage alive

Actions in this part of the call have the medium-term objective of **positioning cultural heritage at the centre of sustainable development** and unlocking its potential as a strategic living resource and driver for economic growth and job creation, social cohesion and environmental sustainability. By doing so, they will also contribute to the **protection and preservation of cultural and historic heritage** in Europe and beyond and will **mobilise investments** in the sector leading to the emergence of a global market for heritage-led innovative solutions and services.

Action	Торіс	Opening date	Deadline(s)
