APPLICATIONS AND REQUIREMENTS

International candidates must have a Bachelor’s degree and have already taken the following courses:
- Mathematics (MATH, at least 4 semesters)
- Physics (PHYS, at least 2 semesters)
- Chemistry (CHEM, at least 1 semester)
- Thermodynamics, Heat Transfer, Energy Systems (THE, at least 1 semester)
- Strength of materials, mechanical drawing, mechanical design and production (MECH, at least 2 semesters)

Adequate knowledge of English is mandatory (level B1 or equivalent).

Candidates must apply online at applymscenglish.unipi.it. Successful applicants must follow the University of Pisa’s standard enrolment procedure.

More details at: www.unipi.it/enrolment.

ENROLMENT AND FEES

Enrolment instructions are available at matricolandosi.unipi.it/en.

Fees depend on the student’s country of origin and vary from €356 euros to €2,452 for each academic year. Information on fee waivers, extraordinary contribution and scholarships can be found at www.unipi.it/tuition-fees.

The University of Pisa (UNIPI) is a public institution composed of twenty departments, with high level research centres in the fields of agriculture, astrophysics, computer science, engineering, medicine and veterinary medicine.

Established in 1343, UNIPI is one of the most prestigious Italian higher education institutions and a modern centre for teaching and advanced research. One of the University’s main strategies is that of internationalisation as it aims to engage with students and researchers and establish long-term partnerships with universities and public and private institutions from all over the world. With a current student population surpassing 54,000, UNIPI offers a large number of degree programmes taught in English and a variety of exchange programmes.

Study at the Department of Civil and Industrial Engineering

The Department of Civil and Industrial Engineering was established in 2012 following the Italian Universities reform which saw the merging of the former departments of Mechanical, Nuclear and Production Engineering, Aerospace Engineering, Chemical Engineering and Materials with that of Civil Engineering. As a result, the current department teaches most of the well-established degree programmes and leads research activities in traditional disciplines within engineering.

The programme is taught completely in English and lasts 2 years, with 60 ECTS credits earned in each. It is closely involved with the European Nuclear Education Network (www.enen-assoc.org/) and with the European Fusion Education Network (www.efen-jacent.eu) with broad possibilities of student exchanges.

COME AND THRIVE

• Develop knowledge in advanced nuclear technology
• Gain an internationally recognised qualification
• Have the chance to do internships abroad
• Get involved with international cooperations

“Become a candidate for the certification of European Master of Science in Nuclear Engineering”
