

AVVISO DI SEMINARIO

Il giorno 26/11/2025
alle ore 15:00 in Aula 22 - F

La dott.ssa Valeria Loreti
Shell

Terrà un seminario dal titolo

Shell Motorsport R&D Programme

Shell's Innovation Partnership with Scuderia Ferrari HP is one of the longest and most successful in motorsport, starting 75 years ago at the inaugural FIA Formula 1™ World Championship in 1950\\.

Race fuels and race lubricants are developed and optimised to deliver more performance and efficiency to the specific Scuderia Ferrari HP power unit. Part of the development is based on the use of advanced digital technology - more than 1,000,000 fuel simulations were used to maximise performance and efficiency of the race fuel currently on track – and part is based on laboratory and engine tests. Engine oils play a vital role in racing as finishing a race depends on maximum reliability. We optimise them to clean, protect, lubricate, and cool the engine under extreme conditions. It helps deliver sustained performance, improved efficiency, and longer-lasting engine protection where it matters most.

By continuously investing in motorsport R&D, Shell is harnessing insights from the elite racing category to evolve road products, delivering enhanced performance and efficiency to customers worldwide.

Gli interessati sono cordialmente invitati a partecipare

Il Direttore
Prof. Fabio Bellina

Il Responsabile
Prof.ssa Francesca Modugno
